

# Шаблон „Събиране на двуцифрени числа“

## Запомни!

Когато събираш двуцифрени числа:

- Записвай единиците под единиците и десетиците под десетиците.
- Събирай цифрите отзад напред – първо единиците, после десетиците.
- Ако задачата е с преминаване, не забравяй да запишеш колко десетици имаш наум.
- Когато събираш десетиците, не забравяй да прибавиш и десетицата, която имаш наум.
